EQUIPMENT SPECIFICATION

MI TOWER

MI TOWER is a versatile and high-quality mobile access tower providing one work platform for one person used throughout the building and construction industry for both indoor and outdoor access solutions, where a stable and secure platform is required.

Ideal for maintenance and installation work or short-term access. It is designed in accordance with the latest testing and quality standards. MI TOWER complies with BS EN 1004 -1: 2020 and WAHR with vertical ladder access and designed for Class 3 loadings. Platform heights between 2.0m & 4.0m internal / external with platform dimensions of 1.1m x 0.7m. Maximum load of this product is 150 KG.

The MI TOWER does not compromise on security, with easy-clip frame clips and easy-lock stabilisers creating a stable foundation for working that is straightforward to assemble. Designed specifically for one-man use, the MI TOWER is small enough to fit into tight spaces, making it suitable for use on a range of sites.

MI TOWER can be built by one person in under 10 minutes and taken down in the same time, using the easy-hang component hangers it removes the needs for an additional person to help build. MI TOWER builds into a compact trolley which is used as the base of the tower but allows for the tower to be transport easily in the back of a van or to be moved around on its castors.

WORKING HEIGHT	4M, 5M, 6M
PLATFORM HEIGHTS	2M, 3M, 4M

CRADLE TO CRADLE CERTIFIED

All raw materials and materials used in the production of the MI TOWER can be reused endlessly.

ECOVARDIS SILVER ACCREDITED

Pop Up Products has been awarded an EcoVadis Silver Medal. This achievement reflects our commitment to sustainable business practices, specifically in the production of the MI TOWER.
